ABOUT US

Noor Garments was founded in 1978 as a garment export business in Karachi, Pakistan. What started of as a small export project, matured and flourished into a leading organisation working with some of the top retailers in the world.

Till today, we maintain the core principles of progress and entrepreneurship upon which the company was originally built.

Within the past decade, we pivoted our focus to the lucrative business of denim. Our state of the art production facility has the capacity to produce over 200,000 pieces of finished denim per month.

OUR FACILITIES

CUTTING

Our cutting facility utilises state-of-the-art Gerber Garment machinery for precision processing with the capacity to cut 10,000 garments per day.

STITCHING

Our sewing facility consists of 15 stitching lines equipped with modern machinery from brands such as Singer, Juki and Mitsubishi.

This business unit employs more than 850 people with equal opportunity for males and females. Managed production systems and favourable working conditions help ensure worker satisfaction and efficient output of approximately 10,000 garments daily.

LAUNDRY

Our laundry department forms the strength of our organisation. We have invested in cutting edge technology to provide us with a range of wet processing finishes that can be tailored according to our customers needs and specifications.

Our reliable washing machines alongside a range of quality dryers help ensure reproducibility across production. This is supported by skilled dry-processing to fully craft each piece of denim.

FINISHING & PACKING

Our Quality Assurance team certifies that our garments are up to the correct standards outlined by our partners. We have developed stringent Quality Management Systems to ensure the highest quality of output. These are supported by training schemes to ensure our employees develop the appropriate competencies.

Hand press machines and vacuum tables help ensure quality finishing of our garments through an efficient process. These garments are then packed and ready to be shipped off.

VISION & MISSION

VISION

We aim to become the leading suppliers of contemporary denim- the hub for R&D and innovation. Our focus is to continually invest in people and technology to help generate innovations within the trends and techniques used to prepare a piece of denim.

MISSION

Our mission is to help empower people through denim. With accessibility to contemporary denim increasing over the past decade, our aim is to develop upon the latest trends in the industry and supply them to our partners at a range of prices.

Our international research team keeps abreast of customer needs and expectations which is then reflected in the products we craft

A stack of folded blue denim jeans, showing various shades from light to dark blue. The jeans are neatly folded and stacked on top of each other. The word "DEVELOPMENTS" is overlaid in white, uppercase, sans-serif font across the middle of the stack.

DEVELOPMENTS

R&D

R&D forms the backbone of our operation. We have an international team that helps us ensure we keep abreast of the latest trends and styles from across the world. Our proactive development team utilises predictive trend analysis and creative design thinking to create a product range that helps us stand out and evolve as an organisation.

RECENT DEVELOPMENTS

A blue-tinted photograph of a large ocean wave crashing, with the word 'SUSTAINABILITY' overlaid in white capital letters. The wave is the central focus, curling over and splashing. The background shows a beach and a cloudy sky. The overall mood is serene and powerful.

SUSTAINABILITY

WE ARE COMMITTED TO DOING OUR BIT FOR THE FUTURE OF THIS PLANET

We understand the responsibility we have as an organisation in safeguarding the environment for future generations. Our aim has been to implement a structure of responsible manufacturing throughout our operations.

Company-wide sustainable practices have been implemented for daily functions to reduce our internal use of energy and water.

We have also evolved our business practices to reduce our consumption of water in production and ensure minimum impact on the environment within our fabric sourcing and waste disposal.

WATER TREATMENT

Water treatment and conservation has been the primary source of our efforts to minimise our operational impact on the environment.

Our Effluent Treatment Plant (ETP) ensures that no harmful chemicals are released into water bodies.

CERTIFICATIONS

The Sedex logo consists of the word "Sedex" in a bold, black, sans-serif font, followed by a red circular icon containing a white stylized shape.The SMETA logo features the word "SMETA" in a bold, black, sans-serif font, accompanied by a cluster of four circles in shades of grey and red.

Sedex SMETA has helped certify that we are aligned with global ethical trading practices within the core areas of labour, health & safety, environmental and business ethics

The Amfori BSCI logo features a blue circular icon with a white stylized '@' symbol above the text "amfori" and "BSCI" in a bold, blue, sans-serif font.

Amfori BSCI has helped us ensure we have implemented socially responsible business practices. It has also increased visibility over our supply chain to certify that we are working with like-minded partners.

WRAP principles are the core standards of production facilities. Noor Garments is committed to maintaining and upholding responsible workplace and environmental standards.
